

The True Timber Alternative System

Efficient

Secure

Authentic

Why choose us?

Appreciate the charm and character that traditional timber brings to a home, without the ongoing commitment of painting and maintenance.

Welcome to the LAYLA Timber Style Collection. Timeless elegance, reimagined.

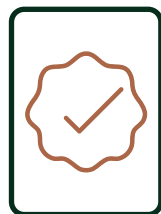

We have created this range for the homeowner who is looking for the timeless appeal of timber windows and doors, without the maintenance. It is an exquisite combination of **classic British aesthetics** and **German engineering**. Designed to mirror the grain, depth, and tactile beauty of authentic wood while offering a level of performance that natural timber simply cannot match.

LAYLA Timber Style

- **Hand-Finished Quality:** Each piece is meticulously brought to life by experienced, highly skilled craftsmen, ensuring a finish that is indistinguishable from timber.
- **Thermal Excellence:** Beyond their striking silhouette, these windows provide a sanctuary of comfort, utilising advanced materials to deliver exceptional insulation and security.
- **The Luxury of Time:** Experience the enduring beauty of wood without the burden of maintenance. No sanding or painting – just the permanent beauty and quality.

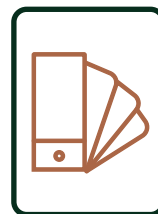

Every window is a bespoke commission, tailored precisely to your requirements.

The LAYLA Timber Style Collection is not merely a choice between beauty and practicality; it is the realisation that you deserve both. Transform your home. Begin your journey with the LAYLA Timber Style Collection.

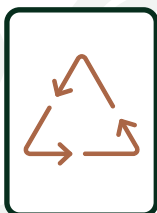

10 year guarantee:

Relax knowing your home is protected for 10 years. One of the longest guarantees in the industry.*

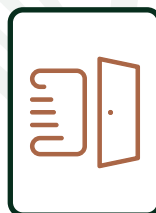

Colour match guarantee:

Create a beautifully coordinated look throughout your home, with a variety of colour options to choose from.

Recycled:

Make a smarter, greener choice for your home and the planet.

Energy efficient:

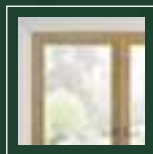

Keep your home warmer and your energy bills lower, with ultra-low U-Values and A+ energy ratings.

Security:

PAS 24 compliant and Kubu Smart Security. Feel safe at home with strong, modern security built-in.

What is a timber alternative product?

A timber alternative window is designed to faithfully replicate the beauty, character and craftsmanship of traditional timber joinery, while utilising advanced modern materials to deliver superior performance and longevity.

The LAYLA Timber Style Collection captures the true authenticity of timber through meticulous detailing, including the optional deep 55mm Radlington-style cills, traditional timber-style jointing, and elegant design features such as monkey tail and pear drop handles, dummy stays, and authentic face-fixed glazing bars that recreate classic cottage aesthetics.

A carefully curated range of textured woodgrain laminates and refined colour finishes, spanning contemporary tones to heritage-inspired shades, ensures every window complements its setting, whether in a period stone cottage, mock-Tudor home, Regency townhouse, Edwardian villa, 1930s semi, or a modern property.

While the appearance is timeless, the performance is unmistakably modern. These windows will never rot, warp, crack, or require painting, offering a truly low-maintenance solution without compromising on style. Engineered for exceptional comfort, they achieve outstanding A+ energy ratings, with options for double or triple glazing, as well as acoustic glass to reduce external noise and enhance everyday living.

The result, is a perfect balance of tradition and innovation, delivering all the charm of timber, with the strength, efficiency and peace of mind that only modern window technology can provide.

Inside

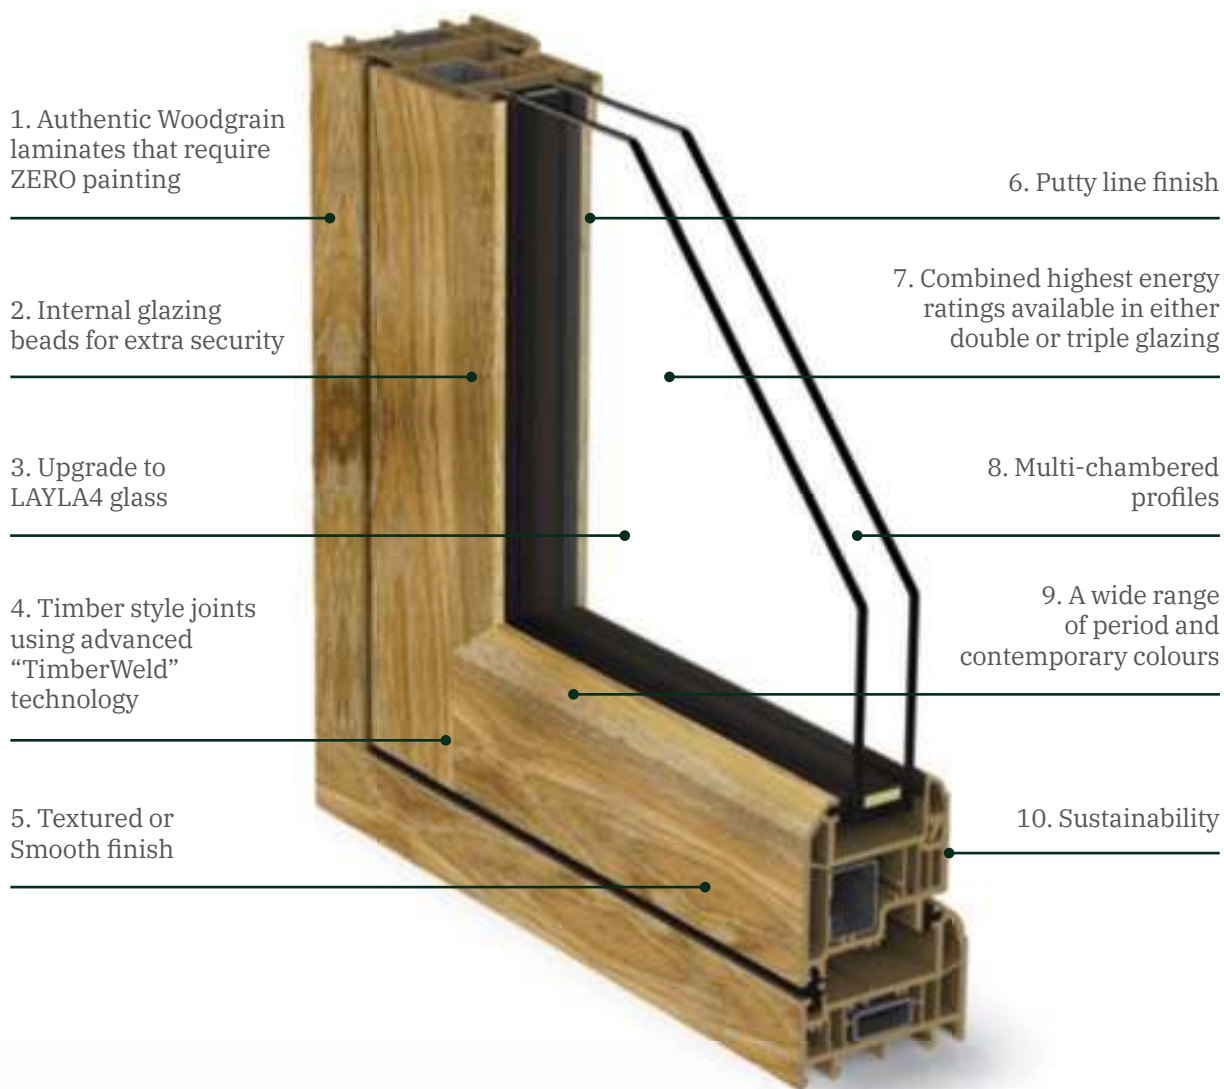

Outside

Timber Weld

The LAYLA Timber Style system, is the most realistic timber flush fit for ultimate authenticity.

Top 10 reasons to choose LAYLA Timber Style windows

1. Authentic woodgrain laminates – highly durable, scratch-resistant, anti-fade and stand the test of time in all weather conditions. Offering easy cleaning, minimal maintenance and ZERO painting.
2. Internal glazing beads for security – LAYLA Timber Style can be PAS 24 and Secured by Design accredited – the highest possible security rating.
3. LAYLA4 upgrade gives four benefits in one, including safety, security and noise reduction as standard, with the added benefit of furniture fade.
4. Timber Style joints using the advanced TimberWeld technology including Arris detail.
5. Surface Finish – the window will never warp, twist or rot and will retain its pristine appearance for years to come.
6. Detailed putty line finish.
7. High energy efficiency rating of A+, therefore saving on your heating bills. Glass width 28mm (double) x 34mm (triple) glazing can achieve a U-value of 0.9 W/m²k.
8. Multi-chamber profile – achieves the highest BSI rating for weather performance.
9. A wide range of colours to suit your home internally and externally.
10. Sustainability – Up to 75% of the profile is made from recycled windows.

Timber alternative windows

LAYLA Timber Style windows combine the timeless appeal of classic wood with the advantages of modern engineering.

Built for strength, security, and minimal upkeep, they showcase realistic woodgrain textures alongside high-performance locking mechanisms. Certified to PAS 24 standards, they provide dependable protection, making them a great choice for period properties or anyone seeking traditional aesthetics with modern-day efficiency.

Built for long-term durability

Our timber alternative windows combine the timeless beauty of traditional wood, with the performance benefits of modern materials.

Engineered for lasting durability, these windows resist warping, rotting, and fading — making them an excellent choice for heritage properties or homes seeking a traditional aesthetic. Security is also paramount, with advanced locking systems and compliance with PAS 24 and Secured by Design standards, ensuring strong protection against forced entry. Backed by top BSI ratings for severe weather performance, they help keep your home comfortable and protected for years to come.

With LAYLA Timber Style, you can enjoy the elegance of timber, the reliability of modern engineering, and the reassurance of enhanced security and low-maintenance living.

Product features

- Glass options – double or triple glazing, can achieve a U-value of 0.9 W/m²k
- PAS 24 and Secured by Design compliant
- Highest BSI ratings for severe weather performance
- Surface Finish – contains a unique compound, so your windows will never warp, rot or twist
- A wide range of colours that are durable, scratch and fade resistant
- Energy efficient A+ rated double or triple glazed windows, will help reduce your heating bills.

Design features

Timeless style, engineered to perform.

With LAYLA Timber Style, you don't have to choose between classic design and modern performance.

Our windows capture the charm of traditional craftsmanship while delivering the performance of modern engineering. Every curve, joint, and finish is carefully crafted to not only look exceptional, but to outperform expectations in durability, efficiency, and comfort.

We're driven by one goal: to give you a better window. That's why we constantly refine our designs using the latest technology and real feedback from our customers. By listening, learning, and improving, we ensure every product we create meets the highest standards — so you can invest with confidence, knowing you're getting the very best the industry has to offer.

Flush external finishes with equal sightline

Dummy butt hinge upgrade (functional butt hinges not available)

Flush internal/external finishes - dummy stays available

A wide range of period and contemporary colours

Authentic timber style joints, including Arris detail

55mm Radlington cill option

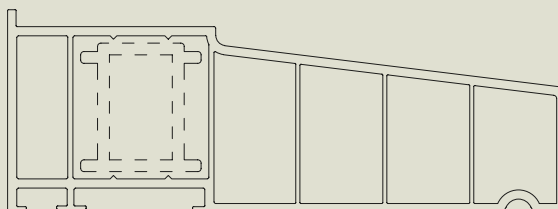

The Radlington Cill

LAYLA Timber Style windows are beautifully finished with a contemporary shallow cill as standard, while the Radlington Cill is the upgrade that truly elevates the overall look. With its deeper 55mm profile and distinctive nose, it creates a more authentic, heritage-inspired appearance, echoing the proportions of traditional timber window cills.

Designed to stand out, the Radlington Cill adds depth, character and a premium finish that enhances both modern and classic properties. It is a superior alternative to the standard cill and the ideal choice for achieving a more refined, high-end aesthetic.

Specifications:

- U values: 1.2 W/m²K double glazed / 0.8 W/m²K triple glazed
- Timberweld technology
- Secured by Design accredited
- A+ energy rating.

Profile dimensions:

W: 165mm x H: 55mm

Glass options that transform your home

Enhance your home with high-performance glass that blends style, comfort and security.

From clear and decorative to acoustic and solar-control options, our glazing improves how your space looks and feels. Whether you want better energy efficiency, more privacy, or a standout design feature, our glazing delivers.

Upgrade your home with ‘LAYLA4’ – the smart glass choice

Modern living deserves smarter solutions — and your windows are no exception. With LAYLA4, you’re not just choosing glass; you’re investing in comfort, efficiency, and peace of mind. This innovative “four-in-one” upgrade is designed to make your home warmer, quieter, safer, and better protected — all in one simple improvement.

Enjoy the 4-in-1 benefits by upgrading to LAYLA4

Energy Efficiency

Stay warm & save on energy

LAYLA4 features advanced thermal technology that helps keep heat inside your home where it belongs. By reducing heat loss through your windows, you can enjoy a cosier living space and potentially lower your energy bills.

Noise Reduction

Enjoy a quieter home

Tired of outside noise interrupting your peace? LAYLA4 includes a built-in sound-reducing layer that helps block unwanted noise, creating a calmer, more relaxing environment indoors.

Safety & Security

Feel safer & more secure

Your home should feel like a sanctuary. LAYLA4’s reinforced glass design adds an extra layer of protection, making windows tougher to break and helps keep your home and loved ones safe.

Furniture Fade

Protect your interiors

Sunlight can fade your furniture, carpets, and curtains over time. LAYLA4 blocks the vast majority of harmful UV rays, helping your interiors stay vibrant and looking newer for longer.

One upgrade. Four powerful benefits.

With LAYLA4, you’re not just improving your windows — you’re enhancing your entire home.

Our glass styles

Internal Georgian bars

Internally fitted bars, available in 18mm or 25mm. Various styles include single bars, curved hoops and grid patterns.

Square leadwork

Handcrafted square patterns in lead, create a grid or border style design.

Energy efficiency

All LAYLA Timber Style products are designed with energy efficiency at their core, helping homeowners reduce heat loss and lower energy consumption.

By combining advanced glazing technology, multi-chambered profiles, and high-performance sealing systems, our windows and doors deliver outstanding thermal insulation. This helps maintain a comfortable indoor temperature throughout the year while also reducing environmental impact.

Whether you're upgrading an existing property or building a new home, LAYLA Timber Style provides modern, stylish solutions that meet current energy performance standards without compromising on durability, security, or aesthetics.

Low E glass – helping reduce energy costs all year round

Summer performance

In warmer months, Low E glass reflects a significant portion of solar heat away from your home, helping to keep interiors cooler and more comfortable. Each unit also features an argon gas mix between panes to improve insulation performance.

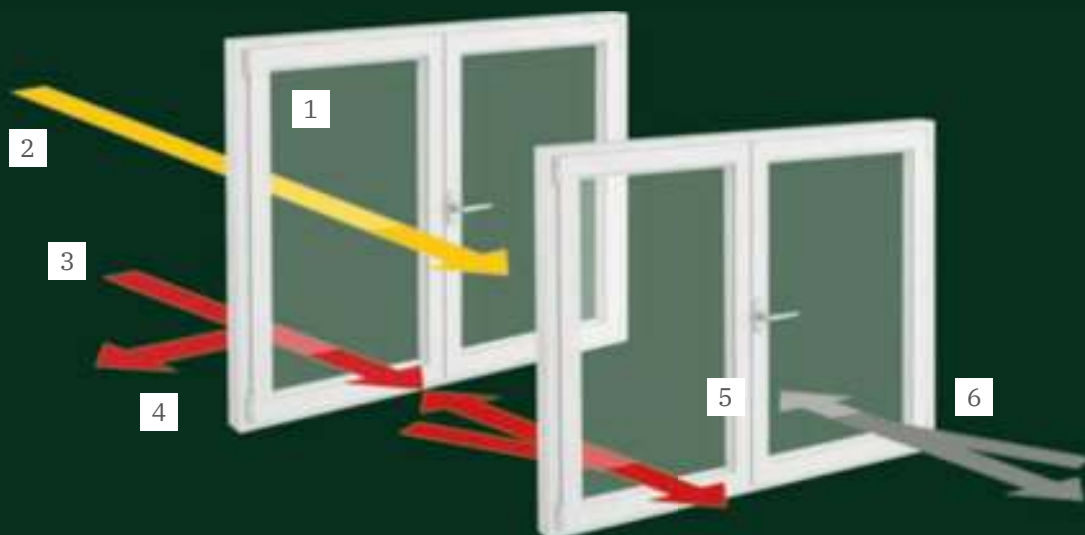

Key features

1. Low E coating applied to glass surfaces for improved thermal control.
2. High levels of natural light transmission throughout the year.
3. Helps block a large proportion of harmful UV rays, protecting furniture, flooring, and décor, from fading caused by sunlight exposure.
4. Reflects most external heat in the summer, to help maintain a cooler indoor environment.

Winter performance

During colder months, the same technology works to retain warmth by reflecting radiant heat back into your home. This helps improve comfort levels while reducing heating demand and energy costs.

5. Argon gas blend between panes further enhances insulation performance.
6. Harmful UV rays are consistently reduced year-round, while radiant heat is retained inside during winter to keep living spaces warmer and more energy efficient.

Thermal efficiency

The LAYLA Timber Style range is designed to deliver both comfort and sustainability. Featuring advanced glazing technology, our products provide excellent insulation, helping to keep indoor temperatures stable throughout the year. By minimising heat loss during winter and reducing solar gain in the summer, they enhance energy efficiency while helping to cut down on energy costs.

Thermal rating

Energy performance is central to our designs. With high-quality glazing and insulated framing systems, our products are built to retain heat effectively and reduce unnecessary energy loss.

Reduced heat loss

Our windows and doors are carefully engineered with high-performance glazing and thermally broken frames to limit heat escape. This helps maintain warmth in colder weather, improving comfort while also lowering heating demands and energy expenses.

Improved drainage path

Designed with an enhanced drainage system, our products help to efficiently channel water away, reducing the risk of water ingress and supporting long-term performance.

Multi-chamber outer frame

The multi-chamber outer frame design creates several insulating air pockets, improving thermal efficiency by reducing heat transfer. This structure also strengthens the frame, ensuring durability and stability over time.

High-specification weather seals

Our advanced weather seals offer reliable protection against wind, rain, and drafts. Providing up to 25% greater coverage than standard seals, they help maintain insulation performance by preventing unwanted air and water from entering.

Premium finish

Combining style with resilience, our premium finish delivers a clean, modern look that suits a wide range of architectural styles. Each product is crafted with precision to ensure both an attractive appearance and dependable performance. The UV stabilised authentic woodgrain laminates offering long lasting durability.

Security & child safety

The LAYLA Timber Style range of windows and doors is designed with safety as a priority, combining advanced security technology with practical, family-friendly features.

Each product includes high-performance locking systems that meet PAS 24 and Secured by Design standards, providing reliable protection and peace of mind. Kubu smart security comes as standard, enabling easy monitoring and control of your home's security.

Child safety features include restrictor options and secure hinges to help prevent accidental openings while still allowing ventilation. Built for everyday reliability, the range combines robust construction with thoughtful design to protect your home without compromising on style or performance.

Handles & hardware

Our range of handles and hardware is carefully designed to enhance every window and door with a balance of style, strength, and precision.

Available in a variety of finishes — from polished chrome to modern matt black — you can find the ideal option to suit both interior and exterior design schemes.

Engineered for long-lasting performance, each component is built to operate smoothly while meeting strict quality standards. Security remains a priority, with robust locking systems and PAS 24 compliance providing added reassurance.

Whether you prefer subtle detailing or more distinctive features, our hardware offers both visual appeal and dependable functionality. Every element is thoughtfully considered to ensure your windows and doors not only perform exceptionally, but also look the part.

For a more traditional finish, matching peg stays are also available in all colour options, helping you achieve a cohesive heritage-style appearance.

A colour for all

The LAYLA Timber Style range offers an extensive selection of colours to complement any home style, from timeless neutrals to striking contemporary tones.

LAYLA Timber Style colour range

Choosing LAYLA Timber Style, will add a touch of timeless style.

With options including smooth finishes, realistic woodgrain textures, and dual-colour combinations, you can tailor both the interior and exterior to suit your design preferences.

Each finish is crafted with durability in mind, using high-quality coatings that resist fading, scratching, and the effects of weather over time — helping your windows and doors maintain their appearance for years to come.

Whether you prefer a subtle, refined look or something more distinctive, our versatile colour range allows you to create a truly personalised finish. Designed to reflect your taste and enhance your home, it's all about making your space uniquely yours.

Colour combinations

Every LAYLA Timber Style product has the option of featuring the same colour finish inside the home, for a custom look consistent with the home's interior.

Vertical sliding windows

Vertical sliding windows provide a classic, space-efficient solution, that complements both period properties and modern homes.

Their traditional appearance is paired with a smooth sliding action, allowing for easy use while maintaining a refined, elegant look. Designed to maximise ventilation and natural light, they offer a practical yet stylish way to enhance any living space.

Built with everyday comfort in mind, these windows feature energy-efficient construction and advanced weather seals that deliver up to 25% greater protection than typical industry standards. This helps keep interiors comfortable throughout the year while supporting lower energy costs. User-friendly details, including easy-clean functionality, make maintenance simple and convenient.

Security and durability are central to the design, with reliable locking systems and robust materials ensuring long-term performance and peace of mind. LAYLA Timber Style vertical sliding windows, blend heritage-inspired design with modern innovation, making them an excellent choice whether you're renovating a traditional home or updating a contemporary setting. Their ability to improve airflow, increase daylight, and elevate overall appearance makes them a versatile addition to any property. Designed with conservation areas in mind, our windows help you meet local planning requirements without compromising on style.

Product features

- U-value of 1.4 W/m²K for double glazing and 1.2 W/m²K for triple glazing
- Acoustic performance: 32-37 dB
- PAS 24 security compliant
- Top sash security bolts
- Reinforced metal tilt arms
- Optional traditional run-through sash horns
- Optional 37mm slim midrail
- Kubu smart security enabled & A+ energy rating
- Authentic timber style joints
- Authentic deep bottom rail.

French doors

LAYLA Timber Style French doors are designed to bring together refined aesthetics and high-level performance.

With sleek, slim sightlines and strong thermal efficiency, they create a natural flow between indoor and outdoor areas. Built with a secure multi-point locking system, they suit both contemporary and traditional properties, offering a balance of durability, elegance, and effortless operation.

Engineered to maximise light and comfort, these French doors feature ultra-narrow frames that help brighten interiors and enhance the sense of space.

Advanced insulation combined with high-performance weather seals — providing up to 25% more coverage than standard industry levels — helps improve energy efficiency and maintain a comfortable home environment throughout the year.

Security is a key focus, with a robust multi-point locking system delivering dependable protection and peace of mind. Whether installed in a kitchen, living area, or garden entrance, these doors provide a smooth transition between inside and outside while adding a premium architectural finish.

Product features

- Low threshold options
- Part M compliant
- U-value of 1.2 W/m²K for double glazing and 0.9 W/m²K for triple glazing
- PAS 24 security certified
- Secured by Design upgrade
- Energy Rating A+, dependent on glazing used
- Highest BSI ratings for severe weather performance.

Sustainability

Shaping the future. Together.

REHAU is one of the top UK recycling system houses
in the Fenestration industry.

Specifiers have unique advantages with
up to 75% recycled content.

REHAU Recycling

Sustainability powered by PVC.

PVCR has been a member of the REHAU Group since 2014, giving REHAU a strong platform for growth and innovation in waste management and uPVC recycling, making REHAU the largest uPVC recycler in the North West. With sustainability as one of the core values, REHAU are constantly working hard with their technical experts and development teams to minimise waste at every opportunity, using every part of the product to create new uPVC window systems through a unique co-extrusion process.

The investment in co-extrusion technology has enabled the use of recycled post consumer waste within our LAYLA Timber Style range, thus ensuring a closed loop process. Consequently holding the British Standards certification BS EN 14001 for environmental standards. www.pvcr.co.uk

Production

REHAU partner customers produce EcoPuls labelled profiles, to bring you eco-designed, sustainability-produced products that save up to 97,000 tonnes of CO₂ per year.

Installation

REHAU products with the EcoPuls label are then installed in your home by our network of partners, save 13 kg of CO₂ in replacement and 17 kg of CO₂ in new construction, per window.

Manufacturing

REHAU manufactures profiles with the EcoPuls seal. Thanks to the co-extrusion process, REHAU combines recycled and virgin raw materials without impairing the performance and usability of the new profile.

Collection

Every year, millions of old uPVC windows, doors and production offcuts are reused in the production of new profiles with the EcoPuls label. For this reason, REHAU maintains an extensive network for the collection of these materials.

Recycling

Collected old windows, doors and production off-cuts are carefully selected and sorted into different raw materials (e.g. glass, uPVC and steel) and then recycled. The uPVC components are then processed into high quality chip. The production of EcoPuls uPVC recycled profiles saves up to 88% in CO₂ emissions, compared to the production of a standard profile on the market.

Our circular economy
